

# ECO-VENT

THE ECO-VENT IS IDEAL FOR ALL DOMESTIC AND COMMERCIAL PREMISES AND IS SUITED TO SEPTIC SYSTEMS, GREY WATER SYSTEMS, SEWER SYSTEMS, GREASE ARRESTORS AND DOMESTIC PUMP STATIONS.

## LID

Lid securely attaches to casing while allowing easy removal for replacement of carbon canister.

## CARBON CANISTER

Reduces methane, hydrogen sulphide and carbon dioxide. Prevents the escape of fungi spores that can enter rainwater tanks connected to roofs. Prevents bacteria from releasing through the vents and entering rain water tanks. Prevents mosquito and vector breeding. Recommended to be replaced every 3 years.

## ECO-VENT CASING

Suits both 50mm and 100 DWV.

Please note, the eco-vent should not be used where solvents and hydrocarbons (petrol, diesel etc) are stored.
