

MAXI WASTE ADAPTOR SYSTEM

THE MAXI ADAPTOR CONTROL WASTE SYSTEM HAS BEEN DESIGNED AND DEVELOPED TO OFFER THE FEATURES SHOWN BELOW.

FLOOR GRATE

An extensive range of floor wastes are available in plastic, stainless steel and brass options.

DUST COVER/TILE TEMPLATE

Dust covers are provided to prevent the entry of debris in the water system during construction. The dust cover also acts as a tile template for the floor waste to be installed after the tiling has been completed. (Plastec range only).

ADAPTOR

The adaptor permits vertical height adjustment. Height extensions are available to accommodate excessive tile beds.

FLANGE

Supplied with either a solvent weld round or square flange. Available also with a RRJ adjustable outlet round flange.

An ultra slim outer perimeter flange, which promotes adhesion to the waterproof membrane.

Surface mounted to avoid the removal of concrete.

Provision of a leak control device.
